AUTHORS

If you want to make the best of your artwork send it in the correct digital format

All articles accepted for publication in Elsevier Science journals are processed using electronic production methods. Authors should therefore ensure that their artwork conforms to the following guidelines:

- **Colour and greyscale images** should be supplied as **TIFF** or **EPS** files (resolution 300 dpi).
- **Line drawings (black & white or colour)** should be supplied as **EPS** files

If you need help to create files in these formats, go to ***www.elsevier.com/locate/authorartwork/formats***

Please also note:

- We still need a good quality hard copy of each figure in case the electronic file cannot be used. The hard copy and electronic file must match exactly.
- We can use floppy disks, ZIP disks or CD-ROM. Artwork files should be on a separate disk or CD to article text files.
  www.elsevier.com/locate/authorartwork/media
- Only standard fonts should be used, for example:
  Times, Times New Roman, Helvetica, Arial, Symbol
  www.elsevier.com/locate/authorartwork/formats
- Lines should be a minimum width of 0.5 pt.
  www.elsevier.com/locate/authorartwork/linewidth
- Only standard colours should be used.
  www.elsevier.com/locate/authorartwork/colours
- Lettering should be a consistent size and appropriate to the size of the figure.
  www.elsevier.com/locate/authorartwork/sizing
- An image which looks acceptable on a computer may not reproduce well, so it is important to ensure that these guidelines are followed.

Our Author Artwork website has all the information you need on how to submit your artwork correctly. Visit it today at:

Don't be left in the dark

Bright ideas. Powered by Scirus

Finding relevant scientific data on the Web can prove difficult. Generic search engines show up many irrelevant results and it's easy to miss out on key information. So that you are not left in the dark, Elsevier Science has developed a guiding light – Scirus, a search engine specifically designed for scientists. It helps you easily locate high-quality scientific information by illuminating only those sites and journal databases with scientific content.

Scirus lights the path to key scientific information because it:

- Targets scientific information only
- Covers over 100 million science-related pages
- Finds the most peer-reviewed articles
- Offers unique search functionalities
- Won Best Specialty Search Engine Award

LEADING ORGANIC CHEMISTRY RESEARCH

tetrahedron.info is a new information gateway from Elsevier Science for researchers and authors in the organic chemistry community

Visit us today for:

- Access to thousands of FREE abstracts online
- Online access to full text articles via ScienceDirect®.
- FREE feature articles
- Free access to *Combinatorial Chemistry: An Online Journal*
- Search functionality across journals
- Comprehensive listings of *Symposia-in-Print* and *Reports*
- Information on the renowned *Tetrahedron Prize* and *Tetrahedron Chair*
- News and events (including the 2003 Tetrahedron Symposium)
- New and forthcoming books - special offers!

** Available to ScienceDirect® customers, Web Editions licencees, or by Pay Per View*
